

Rajeshri Rau

Backend Engineer

niharikagrover@example.net | 05412486874 | Karnal

SUMMARY

Backend Engineer with 6+ years building internal systems. Comfortable across Node.js, FastAPI, async messaging. Comfortable mentoring and reviewing across a small team.

SKILLS

Node.js • FastAPI • async messaging • Postgres • Redis • Python • MongoDB

EMPLOYMENT HISTORY

Backend Engineer, Swiggy (2018 to 2021)

- Reduced background job failure rate from 29% to under 2% by adding dead-letter handling.
- Built OAuth2 authentication and rate limiting for 9 public API consumers.
- Wrote integration tests covering 30% of the inventory endpoints and gated deploys on them.
- Containerised the inventory stack and moved CI/CD onto ECS.
- Designed and shipped 13 REST endpoints for the notifications service in Python.

Senior Backend Developer, Zomato (2022 to 2023)

- Wrote integration tests covering 54% of the onboarding endpoints and gated deploys on them.
- Instrumented the logistics service with metrics and alerts, cutting incident detection to under 15 minutes.
- Reduced background job failure rate from 12% to under 1% by adding dead-letter handling.

Backend Developer, PhonePe (2023 to Present)

- Designed and shipped 5 REST endpoints for the onboarding service in Node.js.
- Instrumented the onboarding service with metrics and alerts, cutting incident detection to under 5 minutes.
- Wrote integration tests covering 50% of the logistics endpoints and gated deploys on them.
- Containerised the inventory stack and moved CI/CD onto Jenkins.
- Added Redis caching in front of the billing read path, absorbing 12K requests per day.

ACADEMICS

BCA

Northgate Institute of Science (2015 - 2018)

CERTIFICATION

- AWS Certified Solutions Architect - Associate
- Tableau Desktop Specialist

PROJECTS

URL Metrics Service

High-throughput counter service backed by an in-process LRU.

Healthcare Records API

FHIR-style REST API with API-key auth and audit logging.

Payment Processing API

Idempotent Go payment flow over BigQuery with retry-safe webhooks.
