

Rhys Turner

Quantitative Analyst

donalddclayton@example.org | +44(0)131 496 0048 | North Valerie

PROFESSIONAL SUMMARY

Quantitative Analyst with 10+ years building production systems. Comfortable across applied ML, Pandas dataframes, A/B Testing. Works well with product and design on ambiguous problems.

CORE COMPETENCIES

applied ML * Pandas dataframes * A/B Testing * Experimentation * Scikit-learn * advanced SQL * Python * Statistics

ACADEMIC BACKGROUND

M.Tech in Computer Science

Crestwood College of Engineering (2010 - 2012)

BCA

Sunrise Institute of Technology (2007 - 2010)

Senior Secondary (Class XII), CBSE

Delhi Public School (2005 - 2007)

EMPLOYMENT HISTORY

04/2024 - 11/2025

Quantitative Analyst, Ola

- * Wrote the metric definitions and power calculations for the logistics experimentation framework.
- * Replaced a heuristic catalog rule with a learned model, cutting false positives by 33%.
- * Communicated onboarding model limitations and failure modes to non-technical leadership.
- * Segmented 150K customers into 13 behavioural clusters that drove the payments campaign.

10/2019 - 02/2023

Data Scientist, Walmart

- * Designed and analysed 13 experiments on catalog, of which 2 shipped.
- * Built causal impact estimates for the onboarding launch when a clean A/B split was not possible.
- * Built a transformer model for notifications that improved accuracy by 61% over the existing baseline.
- * Wrote the metric definitions and power calculations for the inventory experimentation framework.

01/2018 - 09/2019

Quantitative Analyst, Uber

- * Performed exploratory analysis on 40K rows of billing data to size a new product bet.
- * Built causal impact estimates for the billing launch when a clean A/B split was not possible.
- * Replaced a heuristic notifications rule with a learned model, cutting false positives by 21%.

12/2013 - 05/2016

Senior Data Scientist, Google

- * Performed exploratory analysis on 1.2M rows of onboarding data to size a new product bet.
- * Built causal impact estimates for the catalog launch when a clean A/B split was not possible.
- * Replaced a heuristic risk rule with a learned model, cutting false positives by 58%.
- * Productionised the onboarding scoring pipeline with 7 engineers and monitored it post-launch.

09/2012 - 12/2013

Quantitative Analyst, Microsoft

- * Wrote the metric definitions and power calculations for the inventory experimentation framework.
- * Built causal impact estimates for the payments launch when a clean A/B split was not possible.
- * Backtested the logistics model on 21 historical quarters before rollout.
- * Productionised the logistics scoring pipeline with 3 engineers and monitored it post-launch.

ACADEMIC PROJECTS

Sales Forecasting

Hierarchical forecast across 6 regions.

Customer Segmentation

Clustering 220K customers into 16 actionable segments.

CERTIFICATIONS

* Certified Kubernetes Application Developer (CKAD)

* AWS Certified Solutions Architect - Associate
