

Julien Jean

Backend Software Engineer

mlombard@example.org | 01 64 72 92 68 | Menardnec

PROFESSIONAL SUMMARY

Backend Software Engineer with 8+ years building production systems. Comfortable across Python (pandas, asyncio), Java, REST/HTTP API design. Works well with product and design on ambiguous problems.

CORE COMPETENCIES

Python (pandas, asyncio) * Java * REST/HTTP API design * version control (Git) * Microservices * K8s * Docker & docker-compose * advanced SQL

WORK EXPERIENCE

Backend Software Engineer, Accenture (2023 - 2024)

- * Reduced p95 API latency from 1400ms to 45ms by adding Redis caching and rewriting the hottest query path.
- * Migrated the risk service from a monolith to 6 independently deployable services, cutting release time by 64%.
- * Raised unit test coverage on the onboarding module from 22% to 25% and wired it into the CI gate.

Software Engineer, TCS (2021 - 2023)

- * Raised unit test coverage on the risk module from 10% to 38% and wired it into the CI gate.
- * Implemented JWT-based authentication and role-based access control for the internal inventory tooling.
- * Containerised 16 legacy services with Docker and moved deployment to ECS.
- * Built and maintained 13 Node.js microservices handling 40K requests per day for the onboarding platform.

Software Development Engineer, Infosys (2017 - 2020)

- * Built and maintained 8 Python microservices handling 8M requests per day for the logistics platform.
- * Migrated the catalog service from a monolith to 14 independently deployable services, cutting release time by 51%.
- * Implemented OAuth2 authentication and role-based access control for the internal claims tooling.

Backend Software Engineer, Microsoft (2014 - 2017)

- * Introduced structured logging and tracing across the risk stack, cutting mean time to diagnosis by 18%.
- * Implemented API-key authentication and role-based access control for the internal payments tooling.
- * Designed the billing data model in MySQL and wrote the migration scripts for a 220K-row backfill.

ACADEMIC BACKGROUND

BCA

IIT Madras (2011 - 2014)

PERSONAL PROJECTS

CI Pipeline Automation

Automated build and test pipeline that cut feedback time by 39%.

E-commerce Order Backend

REST APIs over BigQuery for cart, checkout and payments, deployed with Docker.

ACHIEVEMENTS

- * Awarded internal Engineering Excellence award for the payments rewrite.

CERTIFICATION

- * AWS Certified Solutions Architect - Associate

INTERESTS

Chess, long-distance running, amateur astronomy.
