

Mitesh Dhaliwal

Quantitative Analyst

upadhritisehgal@example.org | +917135325717 | Nadiad

SUMMARY

Quantitative Analyst with 11+ years building customer-facing systems. Comfortable across experiment design, Python, Machine Learning. Particularly interested in measurable impact rather than shipped tickets.

TECHNICAL SKILLS

experiment design - Python - Machine Learning - sklearn - Data Visualization

EXPERIENCE

2022 to 2025

Quantitative Analyst, Flipkart

- Backtested the billing model on 4 historical quarters before rollout.
- Performed exploratory analysis on 150K rows of claims data to size a new product bet.
- Built causal impact estimates for the onboarding launch when a clean A/B split was not possible.
- Replaced a heuristic inventory rule with a learned model, cutting false positives by 34%.

2019 to 2022

Quantitative Analyst, Myntra

- Wrote the metric definitions and power calculations for the search experimentation framework.
- Performed exploratory analysis on 12K rows of onboarding data to size a new product bet.
- Designed and analysed 6 experiments on risk, of which 2 shipped.
- Communicated payments model limitations and failure modes to non-technical leadership.

2017 to 2019

Data Scientist, Microsoft

- Communicated onboarding model limitations and failure modes to non-technical leadership.
- Replaced a heuristic notifications rule with a learned model, cutting false positives by 30%.
- Wrote the metric definitions and power calculations for the inventory experimentation framework.

2013 to 2017

Quantitative Analyst, Walmart

- Built causal impact estimates for the search launch when a clean A/B split was not possible.
- Productionised the billing scoring pipeline with 5 engineers and monitored it post-launch.
- Performed exploratory analysis on 12K rows of notifications data to size a new product bet.
- Wrote the metric definitions and power calculations for the risk experimentation framework.
- Backtested the onboarding model on 10 historical quarters before rollout.

EDUCATION

MCA

Savitribai Phule Pune University (2011 - 2013)

BCA

VIT Vellore (2008 - 2011)

Senior Secondary (Class XII), CBSE

Delhi Public School (2006 - 2008)

PERSONAL PROJECTS

Churn Prediction

Survival model predicting churn 12 weeks ahead.
