

Nadine Römer

Applied Data Scientist

anna-marie24@example.org | (09243) 82801 | Neuruppin

PROFILE

Applied Data Scientist with 15+ years building large-scale systems. Comfortable across NumPy vectorisation, Experimentation, pandas / numpy. Enjoys owning a problem end to end, from design through on-call.

TECHNICAL SKILLS

NumPy vectorisation ☐ Experimentation ☐ pandas / numpy ☐ Python ☐ applied ML ☐ online experimentation

EDUCATION

B.E. in Computer Engineering

Lakeview Institute of Technology (2006 - 2010)

WORK EXPERIENCE

Applied Data Scientist - Flipkart

Mar 2010 – May 2012

- ☐ Segmented 1.2M customers into 15 behavioural clusters that drove the notifications campaign.
- ☐ Wrote the metric definitions and power calculations for the payments experimentation framework.
- ☐ Performed exploratory analysis on 40K rows of notifications data to size a new product bet.
- ☐ Communicated logistics model limitations and failure modes to non-technical leadership.
- ☐ Backtested the search model on 11 historical quarters before rollout.

Senior Data Scientist - IBM

May 2012 – Feb 2016

- ☐ Replaced a heuristic inventory rule with a learned model, cutting false positives by 56%.
- ☐ Performed exploratory analysis on 3M rows of inventory data to size a new product bet.
- ☐ Backtested the payments model on 3 historical quarters before rollout.
- ☐ Built a transformer model for billing that improved AUC by 30% over the existing baseline.

Data Scientist - Uber

Feb 2016 – May 2019

- ☐ Replaced a heuristic risk rule with a learned model, cutting false positives by 23%.
- ☐ Backtested the notifications model on 7 historical quarters before rollout.
- ☐ Designed and analysed 12 experiments on payments, of which 1 shipped.

Data Scientist - Google

Jul 2019 – Jun 2023

- ☐ Communicated onboarding model limitations and failure modes to non-technical leadership.
- ☐ Segmented 12K customers into 24 behavioural clusters that drove the logistics campaign.
- ☐ Designed and analysed 19 experiments on notifications, of which 1 shipped.

Applied Data Scientist - Ola

Jun 2023 – Nov 2025

- ☐ Built a gradient boosting model for onboarding that improved F1 by 21% over the existing baseline.
- ☐ Communicated catalog model limitations and failure modes to non-technical leadership.
- ☐ Segmented 3M customers into 20 behavioural clusters that drove the logistics campaign.
- ☐ Built causal impact estimates for the notifications launch when a clean A/B split was not possible.

PERSONAL PROJECTS

Customer Segmentation

Clustering 8M customers into 20 actionable segments.

CERTIFICATION

- ☐ AWS Certified Solutions Architect - Associate
- ☐ Tableau Desktop Specialist

ACHIEVEMENTS

- ☐ Speaker at a regional meetup on claims system design.
