

Ralph Zobel

Backend Developer

patberghilde@example.com | +49(0)3919 333071 | Schwerin

PROFILE

Backend Developer with 4+ years building large-scale systems. Comfortable across Python 3, containerisation (Docker), PostgreSQL (partitioning, indexing). Comfortable mentoring and reviewing across a small team.

TECHNICAL SKILLS

Python 3 • containerisation (Docker) • PostgreSQL (partitioning, indexing) • Git / GitHub • FastAPI • REST APIs • in-memory caching (Redis) • Node.js

WORK EXPERIENCE

Backend Developer, Paytm (Feb 2024 – Jan 2026)

- Designed and shipped 16 REST endpoints for the onboarding service in Kotlin.
- Implemented idempotent notifications processing with a message queue to survive retries.
- Reduced background job failure rate from 23% to under 1% by adding dead-letter handling.
- Instrumented the search service with metrics and alerts, cutting incident detection to under 19 minutes.

Backend Engineer, Meesho (Feb 2021 – Jun 2022)

- Implemented idempotent claims processing with a message queue to survive retries.
- Modelled the search schema in Snowflake and tuned indexes to cut query time by 36%.
- Built JWT-based authentication and rate limiting for 12 public API consumers.
- Instrumented the notifications service with metrics and alerts, cutting incident detection to under 15 minutes.
- Wrote integration tests covering 20% of the risk endpoints and gated deploys on them.

Backend Developer, Zerodha (Jun 2019 – Dec 2020)

- Reduced background job failure rate from 5% to under 0.5% by adding dead-letter handling.
- Added an in-process LRU caching in front of the claims read path, absorbing 600K requests per day.
- Designed and shipped 12 REST endpoints for the logistics service in Kotlin.

ACADEMIC BACKGROUND

B.Sc in Computer Science

Manipal Institute of Technology (2016 - 2019)

ACHIEVEMENTS

- Awarded internal Engineering Excellence award for the payments rewrite.

CERTIFICATIONS

- Tableau Desktop Specialist
- AWS Certified Solutions Architect - Associate

PROJECTS

Healthcare Records API

FHIR-style REST API with JWT-based auth and audit logging.

Payment Processing API

Idempotent Java payment flow over BigQuery with retry-safe webhooks.
