

Courtney Mcfarland

ML Engineer

mlee@example.net | +1-756-663-3671x007 | Jessicaport

PROFESSIONAL SUMMARY

ML Engineer with 5+ years building large-scale systems. Comfortable across PyTorch, NLP, Scikit-learn. Enjoys owning a problem end to end, from design through on-call.

SKILLS

PyTorch • NLP • Scikit-learn • TensorFlow • ML platform engineering • Python 3 • Docker

WORK EXPERIENCE

ML Engineer, Qualcomm (01/2024 - Present)

- Set up experiment tracking and model registry so 4 engineers could reproduce runs.
- Ran error analysis on notifications predictions and closed the top 8 failure modes.
- Built the feature pipeline feeding 3 features from PostgreSQL into the inventory model.
- Built an NLP pipeline over 12K documents for inventory classification using PyTorch.

ML Engineer, Fractal Analytics (10/2020 - 01/2024)

- Built the feature pipeline feeding 7 features from MongoDB into the inventory model.
- Set up experiment tracking and model registry so 10 engineers could reproduce runs.
- Deployed the billing model behind a REST endpoint serving 220K predictions per day.
- Trained and shipped a transformer model for onboarding, improving accuracy from 9% to 22%.
- Wrote drift monitoring that alerted on a 60% distribution shift in payments inputs.

ACADEMIC BACKGROUND

M.Tech in Computer Science

Jadavpur University (2018 - 2020)

B.Sc in Computer Science

Anna University (2015 - 2018)

Class XII, State Board

Kendriya Vidyalaya (2013 - 2015)

CERTIFICATIONS

- Microsoft Certified: Azure Data Scientist Associate

ACHIEVEMENTS

- Awarded internal Engineering Excellence award for the notifications rewrite.

PROJECTS

Sentiment Analysis Service

Fine-tuned transformer exposed as a REST endpoint.

Resume Classification System

Hugging Face Transformers text classifier over 40K documents, 24% F1.

Recommendation Engine

Collaborative filtering on 1.2M interactions serving inventory.
