## Summary

Frontend developer working primarily in React.js, JavaScript, HTML and CSS. Builds reusable, responsive UI components, integrates REST APIs into React views, and tunes load performance with lazy loading and code splitting. Comfortable owning the services behind the interface: fault-tolerant API pipelines, authentication, payments and integration tests.

## Technical Skills

**Frontend:** JavaScript (ES6+), HTML5, CSS3, React.js (Hooks, Component Architecture), Tailwind CSS, Bootstrap, Material Design, Responsive & Cross-Platform Layouts, Lazy Loading, Code Splitting, Memoization

**Backend & Data:** Node.js, Express.js, REST APIs, JWT, Webhooks, MongoDB, MySQL, PostgreSQL, Cloudinary

**Languages & Tools:** C, C++, Python, SQL, Git, GitHub, Postman (Integration Testing), Vercel CI/CD

**CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## Experience

Web Developer Intern

Aug 2025 - Oct 2025

*Distance Connect*

- Built responsive, cross-platform React.js UI, consolidating repeated page markup into a shared Bootstrap-styled component set to keep behaviour consistent across screens.
- Integrated REST APIs into React views so the interface rendered live data from backend services.
- Cut frontend load time by 40% using lazy loading, memoization and component-level code splitting.

## Projects

Thumblify: AI Thumbnail Generation & Editing Platform — *React.js, Tailwind CSS, Node.js, MongoDB, Cloudinary*

[Live](#) <img alt="external link icon" data-bbox="855 432 870 445"/> | [Code](#) <img alt="external link icon" data-bbox="925 432 940 445"/>

- **Component Architecture:** Built the React.js and Tailwind CSS frontend as a reusable component set, responsive across desktop and mobile, serving 100+ users generating and editing 2K/4K thumbnails.
- **Generation UX:** Built an in-app chatbot for prompt-to-thumbnail generation, keeping the interface responsive while long-running jobs completed instead of blocking on the request.
- **Auth & Billing UI:** Built JWT auth flows and a credit-based Razorpay checkout, confirming payment via server-side webhook signatures rather than the client success callback, closing a tampering gap.
- **Frontend Performance:** Optimized load time with lazy loading and component-level code splitting; wrote Postman integration tests over auth and payment routes to catch regressions before deploy.
- **Fault-Tolerant Pipeline:** Chose multi-provider LLM routing over a single Replicate integration, trading orchestration complexity for continuity when a provider degrades; added a Twilio WhatsApp bot for mobile.

NextTrip: Trip Booking & Management Platform — *React.js, Bootstrap, Node.js, MongoDB*

[Live](#) <img alt="external link icon" data-bbox="855 606 870 619"/> | [Code](#) <img alt="external link icon" data-bbox="925 606 940 619"/>

- **Role-Based Interface:** Rendered distinct admin and traveler views off JWT roles from one responsive Bootstrap component tree, avoiding two parallel builds.
- **Admin Dashboard:** Built the admin surface for trip listings, promotional imagery and booking analytics, giving organizers one view over live inventory and sales.
- **KYC Upload Flow:** Built an Aadhaar document-upload flow with an admin review and approval queue, letting verified organizers publish trips with rich image galleries.
- **Data & Delivery:** Normalized a 6-collection MongoDB schema with indexed queries; automated Razorpay payments with server-side verification; set up Git-based CI/CD on Vercel deploying on every push to main.

## Education

Jaypee Institute of Information Technology, Noida

2022 - 2027

*Integrated B.Tech + M.Tech in Computer Science Engineering - CGPA: 7.62/10*

## Publications

**Enhancing Network Intrusion Detection Using Conditional GANs for Imbalanced Data Classification** – [IEEE Xplore](#) <img alt="external link icon" data-bbox="155 835 170 848"/>. 99.8% accuracy on the NSL-KDD dataset using Conditional GANs with ensemble methods (Random Forest, SVM, Neural Networks).

## Achievements

- **LeetCode Knight:** 350+ DSA problems across arrays, trees, graphs and DP (LeetCode, TakeUforward).
- **Conference Speaker:** Presented the above research at 17th IC3-2025, IIIT Noida. [Certificate](#) <img alt="external link icon" data-bbox="795 905 810 918"/>
- **Hackathons:** Smart India Hackathon 2023, Adobe India Hackathon, Flipkart Grid 6.0, Amazon ML Challenge.
- **Placement Committee Member:** Coordinating placement activities for 200+ students.
