TUF+: 350+ DSA problems | LeetCode: 200+ problems

Email: Viyomshukla21@gmail.com

Mobile: +91-6397332481

Portfolio: viyom-potfolio.vercel.app

Location: Noida, India

EDUCATION

- Jaypee Institute of Information Technology** Noida, India
Integrated B.Tech + M.Tech in Computer Science Engineering; CGPA: 7.62/10 2022 – 2027
- Gayatri Public School** Agra, India
Class XII (CBSE): 88.6% | Class X (CBSE): 86.6%

EXPERIENCE

- Distance Connect** Remote
Full Stack Web Intern Aug 2025 – Oct 2025
 - Platform UI & Architecture:** : Spearheaded frontend development for an early-stage EdTech startup connecting students with IIT and AIIMS mentors, comprehensively revamping the user interface to enhance student engagement.
 - AI Chatbot Integration:** : Engineered and deployed an AI-powered conversational interface to automate student onboarding and rapidly resolve queries, significantly reducing manual support overhead.
 - Real-Time Mentorship Pipeline:** : Architected a seamless video consultation flow by integrating the Google Meet API, enabling secure 1:1 virtual mentoring sessions directly within the platform.
- Student Placement Committee, IIIT Noida** Noida, India
Coordinator Aug 2024 – Jan 2025
 - Corporate Outreach:** Coordinated with the placement head and cross-functional student teams to source companies actively hiring for campus roles, compiling job requirements and eligibility criteria to prioritize outreach efforts.

PROJECTS

- Thumblify — AI-Powered Thumbnail Generation & Editing Platform (React.js, Node.js, MongoDB, REST APIs, Cloudinary)** *Source Code*
 - Multi-LLM Orchestration:** Designed a fault-tolerant generation pipeline routing requests across multiple LLMs via Replicate APIs to prevent single-provider downtime, scaling to 100+ users generating 2K/4K thumbnails without service interruption.
 - Secure Payment Infrastructure:** Eliminated transaction-tampering risk in the credit-based subscription model by implementing server-side Razorpay webhook signature verification, achieving 100% payment integrity across all completed transactions.
 - Low-Latency Multi-Channel Access:** Reduced generation friction for mobile users by building a Twilio-integrated WhatsApp bot alongside an in-app chatbot, enabling prompt-to-thumbnail generation without requiring users to open the web dashboard.
- NextTrip — Booking & Management Platform (Backend: Node.js, MongoDB, REST APIs)** *Source Code*
 - Secure Access & Transactions:** Engineered role-based access control via Google OAuth 2.0 and JWT for admin/traveler roles, securing 100% of API routes, and automated Razorpay payments with server-side verification, reducing manual reconciliation to 0.
 - KYC-Compliant Identity Module:** Built an Aadhaar document-upload flow with admin review and manual approval, enabling organizers to publish trips with rich image galleries while ensuring KYC-compliant traveler onboarding.
 - Admin Control & Data Layer:** Built an admin dashboard for trip listings, promotional imagery, and booking analytics on a normalized 6-collection MongoDB schema with indexed queries.
- DeepMood — GAN-Based Class-Imbalance Correction (Python, ML, Generative AI)** *Notebook*
 - Data Preprocessing & EDA:** Analyzed a real-world depression dataset through exploratory data analysis, selected the most relevant features, and normalized the data to prepare it for model training.
 - Synthetic Data Generation with CGAN:** Identified that depression cases were underrepresented in the dataset, then built a Conditional GAN to generate 5,000+ synthetic records, balancing the classes and improving classifier accuracy to 92%.

RESEARCH & PUBLICATIONS

- Enhancing Network Intrusion Detection Using Conditional GANs for Imbalanced Data Classification** *IEEE Xplore*
 - Implemented a Conditional GAN to synthesize rare attack samples in the NSL-KDD dataset, balancing class distribution and training Random Forest, SVM, and Neural Network classifiers to achieve 99.8% detection accuracy across underrepresented threat categories.

ACHIEVEMENTS

- International Conference Speaker:** Presented published research at the 17th IEEE IC3-2025, IIIT Noida. *Certificate*
- Competitive Programming:** Solved 450+ DSA and 50+ SQL problems across TUF+, LeetCode, and GeeksforGeeks, focusing on optimization, time complexity, and algorithm design.
- National Semi-Finalist — Smart India Hackathon (SIH '25):** Selected among the top national teams across India in the Tourism domain.
- National Hackathon Competitor:** Competed in the Amazon ML Challenge and Adobe India Hackathon '25.

TECHNICAL SKILLS

Programming Languages: C, C++ (Proficient), JavaScript, Python, HTML, CSS, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS

Tools & Technologies: Git, GitHub, MongoDB, MySQL, API, VS Code, Firebase, Cloudinary, AWS (Basic), Postman, Notion, Slack

Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP, Machine Learning
